plastic utensils
plastic bottles
laundry detergent jar

lid

battery

button cells
small batteries
laptop batteries,
flashlight batteries

plastic covering

compost

food scraps
trimmed leaves
branches
sawdust
wood(unpainted)
garden waste
tea bag

plastics
animal waste
(goes in the toilet)

trash

food scraps
paper towel
tissue
ceramic dishware
floor sweepings
food soiled paper
food wraps

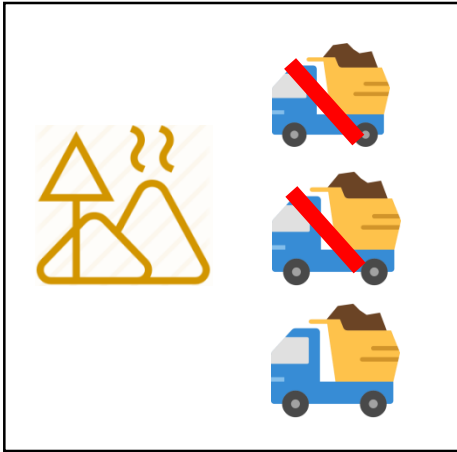

recyclable materials

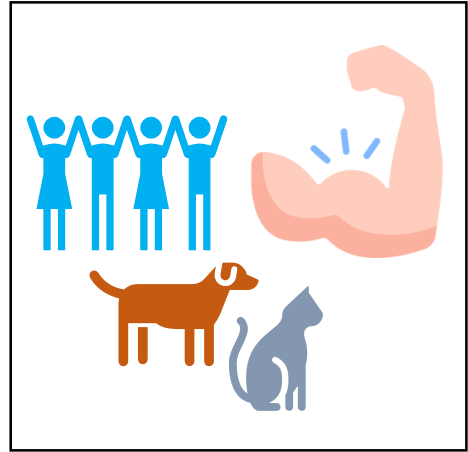

importance of waste segregation

Managing Landfills

Waste segregation results into less amount of waste goes in the landfills

Health Problems

Health problem concerns and cases in the community will reduce.

Garbage Collection

Waste segregation helps garbage collection to be convenient on collecting and recycling waste.

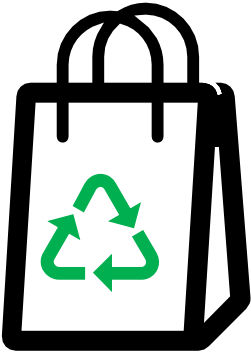

Saving Life and Environment

Waste segregation with sufficient number of trash bins reduces waste that harms biodiversity and ecosystem.

manage waste at home

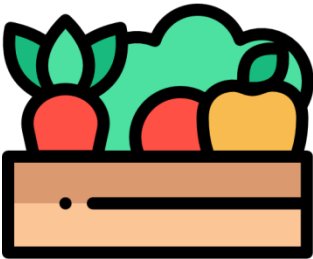

Refuse single use plastic

This simply way will greatly reduce the amount of waste you bring into your house. Use reusable cloth bag instead.

Reuse containers

Durable containers have a second purpose, to hold reusable, to store dry goods, and left-over food.

Buy food that has less packaging

Look for ways to buy food with minimal packaging especially plastic packaging.

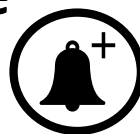

Don't consume bottled water unless it's a must

bottled water is a major source of waste in municipalities. consider using reusable bottle that is made up of stainless steel instead.
